Dear Friends,

March 2014

Spring is nearly here! We know many of you have had a pretty rough cold season this winter. Here in Sunny Arizona, winter is nothing to complain about. The springs here in the Sonoran desert are most often spectacular.

Quite a few of you have already registered for our **17th annual “WEALTH PROTECTION CONFERENCE”**, which will be held this year Friday May 9th and Saturday May 10th in Mesa AZ. Those who have registered already have gotten the early bird special and saved \$50 per registration. This will be offered until April 1st 2014.

We have received an overwhelming push to expand our Wealth Protection Conference. So after careful consideration we made some exciting improvements. It will be bigger, better and more balanced. Don't miss out; our customers and subscribers will have first priority, but we **WILL** sell out. May is a very popular time of the year in the Valley of the Sun so be diligent; register now and get your hotel reservation ASAP if you intend to join us. This is shaping up to be the very best yet! **Call us to register 800-494-41489 or register on line www.wealthprotectionconf.com**

More spring cleaning... Postage rates have been going up and we are trying to keep our costs down. After this March letter, we will be doing test runs at sending this letter out via email to those who we have a valid email address.

You might get an email and hard copy once or twice as we make this transition. If you find you are missing the letter in the U.S. mail check your email and spam box and add Metaguys@BuySilverNow.com to your address book. You will be notified when we switch over to our new website. HardMoneyWatch.com

We gift the letter free for one year. If the reader becomes a client, we will continue to send the letter. However, we are in the process of sorting out those who have become clients or like Resource Consultants, Inc. enough to refer their family and friends to us, from those who are most likely not reading the letter at all. Nobody likes junk mail and we want to send our letter to those who enjoy it, so from time to time we like to clean up our data base. If we have not heard from you in a long while and you find yourself missing our letter and wish to be put back on just give us a call.

Arch Crawford will be joining us again in May for the WP conference. Arch, is a renowned financial astrologist whose predictions have often been spot on. While Mr. Crawford sees very troubled times ahead and has correctly predicted changing weather patterns, market meltdowns and political tyranny. We are glad he is seeing good moves for gold in the very near future!

THE MOST POSITIVE ACTION WE'VE SEEN IN GOLD FOR A LONG WHILE!

After experiencing lower and lower lows for an extended period, **GOLD** was able to hold above the June 28 bottom on a retest at year-end. In January, it finally broke up through a long running downtrend channel line, and this month through the still declining 200-Day MA (blue line). Since then it has held above the 200-Day MA and the 1300 round number resistance, which is now support.

Though it's the best action we've seen, it doesn't mean Gold is 'out of the woods' yet. It could be forming an extended 'line' or 'flat' in the 1200-1400 range before accomplishing anything dramatic. However, we believe in the 'dramatic' for this shiny element, and that one day we will wake up to surprising multiples in dollar terms. People ask: "What do you think Gold could go up to?" We say: "It's not how much Gold is going Up, the question is how much is the US\$ Dollar going DOWN?"

Every declining empire has seen its currency corrupted, debased and finally placed on the trash-heap of history. Why would you think the Fiat currencies of today will be any different? The "debasement" is already well under way, as exemplified by the word "Fiat" which means that it is no longer backed by anything considered valuable by its adherents. These currencies are backed by "the full faith and credit" of the issuing governments. How exactly are you expected to bite into that if something goes horribly wrong. You may end up with worthless paper. But if you have Gold or Silver, your value may be unchanged or even enhanced in "buying power" terms.

A further “debasement” has already occurred with the aforementioned pumping of \$14 trillion over the last six years by global central banks. That means to us that we are in the later stages of debasement which is actually a tax on the people holding on to that currency. As governments Print more, each one in circulation is worth proportionately LESS. In plain English that means our governments are screwing us!

Therefore, to own Hand-held Gold is to have an insurance policy that they can only screw you up to a point. But they’ve already taken care of that. Our last three dearly beloved Presidents have signed “Executive Orders” otherwise Presidential Edicts making it legal under “emergency” conditions for them to come and take our water, our food, our gold and our weapons. All we need now is an emergency.

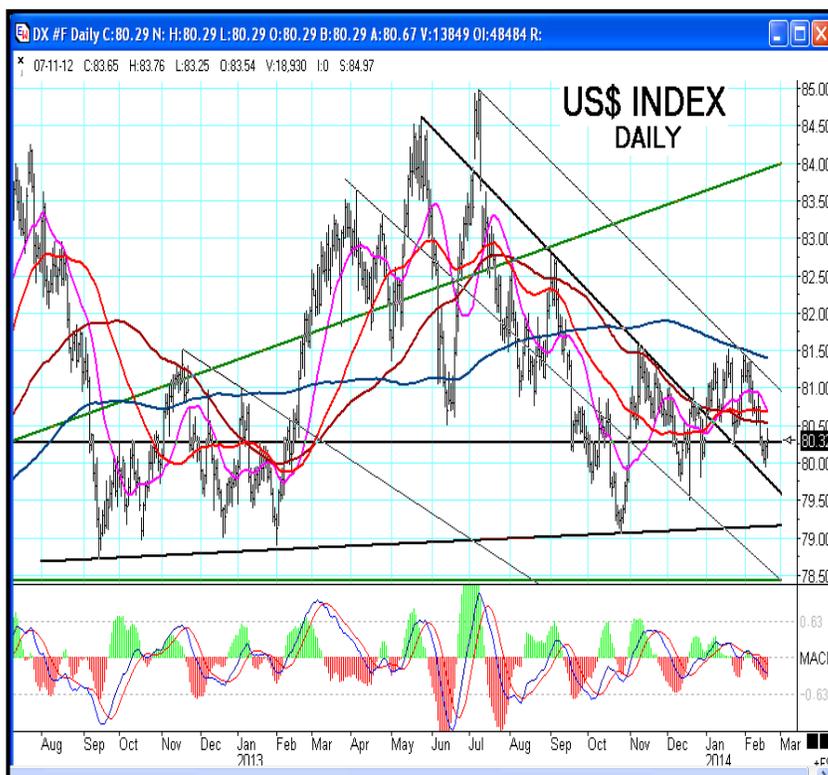

“It is easier to tell a man a lie, than to tell a man he is being lied to.” - Mark Twain

For metals we have purchased from Pat & Linda Gorman at Resource Consultants in Tempe, AZ (1-800-494-4149) and www.buysilvernow.com I have been a speaker at their Tempe conferences for over 10 years. **Again May 9-10.**

US\$ Dollar Index MUST hold 79-80 level!

The last 3½ years, the **Dollar Index** (DX) has been trading between 73 and 85, the last 6 years between 71 and 89. The 200-Day Moving Average has recently dipped below 81.50. A close below 80.00 would be a negative but a close below 79.00 could be technically catastrophic!

The Index is the Dollar compared to the currencies of our 12 most active trading partners. It does not tell us how we’re doing against unfriendlies. We feel that a long term decline from about 122 in 2001 to near 70 in 2008 will continue in the not too distant future as there are many countries who are not happy with the powerful Petro-dollar as the world’s reserve currency.

Saddam Hussein was the only one who broke the hold the U.S. had over OIL and traded in other currencies. That was the doom that fell on his head – not WMD’s. They were the “cover story.”

Iran started their own OIL trading market NOT using dollars and THAT is the reason for our boycotts and threats – NOT nuclear weapons. Guess you have to tell the ‘Rubes’ something that they can understand without too much trouble, something one could scare them into going to war over.

We feel that the breakout of Metals and other Commodities above 200-Day MA's may be the expected acceleration in Inflation which will bring higher interest rates and greater carrying costs for the mountains of DEBT!.

OIL has finally broken back over 100, and GAS at the pump has begun a steady rise over the last couple of weeks. It has been stuck under its 200-Day MA since late October. We have said: "It must break solidly above 100 or solidly below 92 to herald a new direction." The break is to the upside, but the momentum is weak, leaving some doubt as to the longer term trend.

Crawford Perspectives is published 12 times per year. www.CrawfordPerspectives.com 520-577-1158

Many of you have been asking about **Bitcoins**. We have not invested in them personally and feel they are not the wisest place to put our money. Roger Wiegand, editor of Trader Tracks confirms what we've been thinking in his 2/14/14 newsletter. Roger will be back with us at the Wealth Protection Conference in May!

Roger Wiegand – Bitcoins

Bitcoins are Fraught with Problems We said this idea was a dud from day one. Fraud is too easy and real circulation of these bitcoins clashes with U.S. Treasury currency and the currencies of other nations. **Buy and hold real currencies such as the gold and silver coins of the USA and Canada.**

In the following article The Daily Bell states February 26, 2014 in Free-Market Analysis: Mt. Gox, the bitcoin exchange, is gone and bitcoin closed under \$500 today, which is nowhere near its high. Most importantly, many questions have arisen...and the answers as we are seeing are not necessarily positive.

We Don't take any pleasure in what's happening to bitcoin, but we did predict a great deal of it.

It wasn't much fun, however. For taking skeptical view of bitcoin, we've been excoriated by some of our libertarian friends on the web. We apparently angered people just for asking at questions at a time when bitcoin boosterism was at its height, over a year ago.

We asked lots of questions and floated a verity of suspicions. One suspicion, for instance, that the bitcoin was not entirely secure, has been borne out with the takedown of Silk Road. Our idea that it might be a kind of dominant social theme- an establishment set-up- also seems plausible given endorsements of bitcoin by some of the most powerful figures in the US monetary establishment, including Ben Bernanke.

Just yesterday (2/25/2014), at the height of the Mt. Gox hysteria, came word that Larry Summers had kind words to say about bitcoin. According to Summers, the virtual currency "has the potential to be a very, very important development."

We also pointed out that bitcoin's currency obscured block chain is indecipherable but it may not be in a decade. Who knows how technology changes anonymity over time?

The late doyenne of alternative currencies, UNESCO's Margrit Kennedy, was preaching LETS trading systems- with similarities to bitcoin- that are backed enthusiastically by her former UN employer...probably because they also demand a general ledger. This is most helpful of course, when the government wants to investigate for nonpayment of taxes, etc. Finally, It always seemed to us that gold and silver were perfectly good alternatives to a wretchedly complex digital system. Granted, they are not as directly fungible as bitcoin, but they've been around for millennia. That's more than the bitcoin's few years.

Electronic- digital- currencies may indeed be the proverbial wave of the future. But **we would urge readers to be prudently diversified, and not forget about gold and silver. Those metals have been "Money" for a good deal longer than digital alternatives.** ~

For more articles on bitcoin go to www.thedailybell.com

If the monetary system actually crumbled right now. How are you sitting? Obviously, most of us need to have some funds in the banking system in order to conduct business and pay our bills. But what about when the Cypress scenario becomes part of the global banking nightmare? The debts are too large and the US, Japanese and European monetary systems can't be sustained nor can the debts be repaid. Right now. Think... What will you do? Do you have some means of feeding yourself and your family? Have you stored some food and water? Do you have barter-able goods?

Most of our readers are pretty smart and have already tucked away some physical silver and gold throughout the years. Some of you are on a regular regimen of acquisition and feel you are getting in pretty good shape for whatever comes your way. Many of you are just starting to actually dip a toe or two into the metals market and develop an understanding of what is happening in the financial-paper arena. As a metals company, most of those who contact us are to some extent or another Gold or Silver bugs. However, truth be told, very few people out there actually *own* gold. The banksters have repeatedly launched attacks on the paper futures driving prices down and frightening the weak sisters to sell out and hide under a rock. There is a method to their madness. When the day comes for the Global reorganization of currency those who hold physical gold or silver will most likely do pretty well outside of "the system".

That is where our Category One comes in. We call this our Insurance Category because this is the group of metals we suggest you choose from to put way to protect your wealth. It might help if you can visualize the modern Gold Coins such as Gold Eagles, Or Gold Maple Leafs and bars as a precious metals savings account and Silver coins and bullion pieces as your currency.

Until recently the only pure silver bullion pieces readily available were at least one ounce peices, such as the U.S. Silver Eagle, or Austrian Silver Philharmonic or silver rounds or **bars Now, we are happy to announce that you can also get ½ oz. or ¼ oz. .999 silver rounds in the Buffalo or Walking Liberty design.** This is a pretty nice store of metal for the small purchases you might need to make at some point.

Fractional Gold is still very sought after for obvious reasons. Now is a good time to pick up the ½ oz., 1/4oz or 1/10 oz. Gold Eagles. Your best value will come with volumes of at least 5 oz. We do not turn any size request down.

Remember too that you can have Gold bars in several different sizes. The Kilo bars weighing 32.1507 troy ounces were quite popular a few years back. **The smaller, 1oz bars are by far the most popular now and we are seeing many more folks asking for the smaller sized bars especially the 10 gram size.** Just about every item afore mentioned is acceptable to put in your IRA account too. If you have questions on how to set up a precious metals IRA or need help with any part of the process, just give us a call. Resource Consultants, Inc. has been assisting our clients with this process for many years. If you would like to have more than just paper in your IRA we would like to help you too!

Bags of pre 1965 U.S. 90% silver dimes, quarters and half dollars are still available. These can't be put in your IRAs but are still one of the items most folks really like because everyone recognizes them and they are a valuable part of American history. A "Bag" consists of \$1000. face value. So for example, a full bag of quarters would have 4000 quarters in it.

Along with the category one, which in our opinion, should be the backbone of your portfolio, you might like to look at picking up some of the old U.S Gold and Silver coins that we feel are **"Insurance With A Kicker"** We call this second category that because we are speaking of the **slightly circulated Silver Dollars and \$20 St Gaudens or Liberty \$10, \$5 and \$2.50 coins.** These coins usually carry a slightly higher value than the bullion coins but because they are in XF or AU condition (probably from spending a little time in a cowboy's pocket) they do not have the higher premiums and collector value of the Mint State coins. These can be a nice store of private wealth as well as an interesting thing to collect. **Date sets have long time been admired and are really fun to put together.**

The Third Category is what we call Speculation. United States Numismatic Gold or Silver Coins that have been graded by PCGS or NGC as Mint State carry a collector value as well as the intrinsic value of the metal. We carry everything from the lower grade and common dates to the very rare dates and high grades sought by true collectors. Collector coins are not necessarily for everyone. But for those who have some discretionary money, they have often proved to be wonderful investments as well as a source of pride and satisfaction in having something very special! Please call us for current prices and availability

For more details on what we like to recommend for our clients go back to some of our previous newsletters. There you will find many descriptions and recommendations for various items. Remember, you can call us Monday through Friday at 1-800-494-4149 or 480-820-5877 and talk with us about your goals or concerns.

Nothing stays the same. The one who tries to stay in place by non-action will soon find himself feeling like he's falling backward as he watches the world pass by. We are continuing to grow and find new and better ways to serve our clients and still remain a family owned and operated company. . This year our 17th Annual Wealth Protection Conference will be the best yet! We really hope you make the effort and join us. This conference will be addressing so many issues facing us all; it could prove to help you in ways you can't even imagine!

We have always had some pretty wonderful raffles. Some of you have won Gold or Silver coins. This year, you could even win a cruise for two! Yes, years ago Pat & I dreamed of doing the conference on a

cruise. Now, we are pretty close to that becoming a reality! We would love your feedback as to what you would like to hear and what would be your dream vacation!

Thank you for your continued business and referrals. We want to also thank you for the kind notes and Kudos so many of you have sent us. We read them all and cherish them and you!

God Bless,

Linda C Gorman

Linda & Pat Gorman

Resource Consultants

P.S. Please let us know ASAP if you'd like to register us for the conference in May! You will save \$50 with early registration!
