Dear Friends,

July /August 2017

First of all we want to offer our prayers and kind wishes for those who have been dealing with true stresses. We all have day to day trials and problems, but sometimes, and more often than we can really grasp, really devastating things happen that put life back into perspective.

The Goodwin fire, has consumed over 28,000 acres. They say it started from a charcoal fire that was not put out properly. Summer wildfires are often easily prevented but once started, they take on an energy of their own that can be next to impossible to contain. Some will never be able to recover from the loss. The firefighters are incredible heroes and are to be commended in their brave efforts to contain and extinguish this massive fire. Sadly this is one of several wild fires burning in AZ and there are areas in other states in similar trouble.

Those of us who have our health, ample food and water, someone to love and a roof over our head we are truly blessed and should never take these gifts for granted.

Fires bring about sudden anxieties and changes to a landscape or to any living thing in its path. We do what we can to keep our properties safe and insured and try to support those who aren't as fortunate by educating them or lending a hand or a shoulder when needed.

Resource Consultants, Inc. as you should know is a full service precious metals company. We buy and sell Gold, Silver, Platinum and Palladium coins and bullion as well as are metals dealers for Precious Metals IRAs. Pat and Linda Gorman, the owners of RCI have been in the metals business for over 30 years and believe that owning physical precious metals can and should be an important part of anyone's well balanced portfolio. The stock market has been doing great and is enjoying all-time highs. It is also mostly tremendously over valued and two years past a normal

cycle. When this super cycle breaks it could make the last crash look like a joy ride. Most wise investors in stock or real estate would agree that a good way to grow wealth is to buy low and sell high. At this time the metals markets are bouncing on the bottom and stocks are teetering on the top. It just could be the best opportunity you will see in years to take some of your profits and pick up metals at very low prices! Remember, physical precious metals values will never go to zero, that is something that can't be said about many stocks. Precious metals are also easy to liquidate when the time comes. Even real estate can have challenges there.

**BACK UP THE TRUCK!
SILVER
CATEGORY ONE ~ INSURANCE**

All metals are a steal at this time but silver is just about the best investment available right now. The spot prices are insanely low and so are premiums. If you have any concerns over your financial security, the importance of getting some physical silver while it is so undervalued is pretty much a no brainer. For those who bought when the market was at its peak, now is the time to pick up more at half the price to cost average your investment.

Pre 1965 US silver coins sometimes referred to as “junk silver” are one low premium choice for fractional silver. The most common way of acquiring them are in \$1000, \$500, \$250. face value bags of dimes, quarters or half dollars. For those who are unfamiliar with the term “face value”, it refers to the amount of value stamped on the face of the coin. So, 10 dimes, 4 quarters or 2 half dollars would equate to a \$1 face value. When you order a full \$1000 bag of 90% silver, you would be getting 10,000 dimes, 4,000 quarters or 2000 half dollars. Of that bag, about 715oz of it is pure silver. The rest of the weight is the 10% alloy. We offer 90% silver in any quantity and you can mix the denominations to be, for instance 1/2 bag dimes, 1/4 bag quarters and 1/4 bag halves or whatever is your preference. Call 800-494-4149 to order yours.

Modern one ounce silver coins from government mints or one ounce silver rounds from private mints are always a favorite. These are available in rolls of 20 or 25 ounces per roll or in monster box quantities of 500 ounces. They are very pure, at least .999 and are IRA acceptable too so you can have them in your precious metals IRA account.

Pictured above, Eagle, British Britannia, Austrian Philharmonic 1oz Silver Round Mexican Onza and Canadian Maple Leaf

Roll of 20 Peace Silver Dollars

Silver is widely used in dentistry, medicine, technology and jewelry and even clothing . The demand for silver is growing every day. Much of this precious metal ends up trashed as an industrial metal and is unlikely to be recovered. Silver is ridiculously undervalued right now. Owning physical silver, having possession of it, could protect you when the dollar or stock market fails or paper silver derivatives hit their demise.

GOLD **CATEGORY ONE ~ INSURANCE**

We recommend pretty much the same items each letter, because they are, in our opinion, the most recognized, liquid and safe choices in precious metals available. You can go to any of our prior newsletters and read articles about the different coins we recommend to our clients. In this first category for gold, own some one ounce gold coins and or bars. The one ounce has the lowest premiums but with today's low metals prices, now is a great time to fill up on some of the fractional pieces as well! You can pick up singles or rolls of these coins, and yes, Gold coins come in Monster boxes! Collecting gold bullion coins can become a great pleasurable hobby as well as a store of wealth. There are so many designs and countries of mintage to choose from. Gold coins have for centuries been considered treasured gifts for weddings and other special occasions. It's great to see so many young people learning about and starting their own hard money portfolio. Call Resource Consultants, Inc. today and let us help answer any of your questions or give you our recommendations. **800-494-4149**

Because life at its best is balanced, we like to share with our readers additional information from time to time that we hope you will find interesting and helpful on subjects such as finances, and world or economic issues. Life, to be great, needs to be balanced in all five realms: Physical, mental, spiritual, financial and social so sometimes we will touch on these subjects too.

In our newsletter Resource Consultants attempts to help our readers by bringing you some ideas to consider or give you something to think about. We don't expect everyone to agree with everything we print. But we do like to offer a sometimes controversial article now and then in hope that it will open a new thought or perspective.

This edition of our newsletter features an article by Kenn Riordan. Kenn has contributed a few times before and he is one to speak and write from the heart and personal experience. He was a little concerned that it might be too controversial for publication. However, Politically correct or not , we find it interesting and we believe that it does reflect much of what we are facing now, a possible civil war, and a crisis that we fix now or we are undone.

From Russia, Not With Love

Maybe ([МОЖЕТ БЫТЬ](#) in Russian) is one of the most popular vernacular words heard in Russia, an inclination like that of the Orient to not say no to any question or request. I lived and worked there from 1994 – 1998, the most exhilarating and challenging thing I have done in my life. Being part Russian on my mother's side made it just more so. Russia, having been under Mongol rule during 3 centuries from 1247 to 1450 after being subdued by Baku Khan, is, as one of my Ukrainian partners said, "You must remember Ken, that the Ukraine is a European country and Russia is an Oriental country". You should also know that the first two major settlements in Russia, Novgorod Veliky near St. Petersburg and Kiev, were Viking settlements dating to the 9th centuries. So there you have it, part Mongol and part Viking, with Slavs at the core, this is Russia. I should note that I not only lived in Moscow, working with current and former intelligence operatives there to do business, not gather intelligence, but also served as the lead for the Counter proliferation Office, Office of the Secretary of Defense, under SECDEF Cheney and ASD for Policy Wolfowitz, on the N. Korean missile issue, granting me a unique perspective on two major issues impacting President Trump and the Congress.

I am writing this at the request of the editors to help the readers understand better the current political environment facing the newly elected President whose Administration has as its goals:

1. Divert his agenda from “America First” issues such as rescuing Obamacare, reconstituting the Armed Forces, and reducing taxes on both individuals and businesses – in opposition to globalists like George Soros,
2. Impeach him, just as William Jefferson Clinton was, a vote I witnessed in the US Senate gallery,
3. Collapse the second pillar of the Trump agenda which is to redefine our national security strategy in part by confronting the rapidly emerging nuclear powers of Iran and N. Korea, who were either helped or ignored by the prior Administration.

Let’s looks at:

1. The intelligence and facts supporting Russian collusion and/or interference with the last election,
2. A review of the history of the major political parties and Presidents vis - a - vis US Communist party activities,
3. How does this relate to the Trump Presidency and threats posed by Iran and N. Korea.

Russian Collusion

To make it brief, there is no evidence of collusion nine months after this allegation was raised, as the former FBI Director recently testified, as Democratic Senator Feinstein re-iterated, and as key Committee Chairpersons of the House and Senate have known for several months, leaving the President to twist slowly in the wind. Further, given the treasonous and felonious number of leaks from members of the intelligence community and Obama political appointees, if there was evidence, would it not have been already revealed? We also know now that President - Elect Trump was monitored by the prior Administration and that LTG (Ret) Flynn’s widely reported conversation with a Russian diplomat was monitored while he was physically in the Trump Tower. Russian interference in our elections has occurred over many years as we have in theirs, and as the Obama Administration stood accused and investigated by the US Senate for an effort to defeat the Israeli Prime Minister Benjamin Netanyahu during the 2015 elections. ¹ Thus, Russian collusion is a well thought out strategy to distract POTUS and his Cabinet and staff from their agenda as stated above. The readiness of our military of itself is an example of why it is so important to oppose this strategy of diversion,

“Only three of the [Army's](#) 58 Brigade Combat Teams are ready to fight; 53 percent of [Navy](#) aircraft can't fly; the [Air Force](#) is 723 fighter pilots short; and the [Marine Corps](#) needs 3,000 more troops.” ² Amazing sentence to digest for someone who was responsible for the Army’s personnel database for two years when we had 780,000 active duty soldiers in a relatively peaceful world situation and now we have 545,000.

A secondary objective of this meme is to pressure Trump into saying or doing something which can be then used to impeach him should the Democrats regain the House or Senate.

US Communist Party Long-Term Strategy

The strategy of the American Communist Party (CPUSA) since its inception in 1919 was to avoid a head-on conflict with democratic forces in the US, rather to infiltrate, control and set the goals of the labor unions and our educational system. It is well known that Ronald Reagan was a Democrat until he was elected President of the Screen Guild Union and was so heavily pressured by the Communist elements of that union that he sought to remove Communist members, later turning to the Republican Party, and becoming a lifelong enemy of Communism and the Soviet Union. As he stated before the House on Un-American Activities in 1947:

“That small clique referred to has been suspected of more or less following the tactics that we associate with the Communist Party”.³

As Wikipedia relates about the CPUSA “It played a prominent role in the U.S. labor movement from the 1920’s to 1940’s, having a major hand in founding most of the country’s industrial unions ...The Communist Party is based in NYC. From 1922- 1988, it published *Morgan Freesheet*, a daily paper written in Yiddish” which can be read today in English on the internet as the *People’s World*.⁴ This history is widely recorded, the google references of accredited sources runs 3 pages or more, and is in part footnoted in the event you find this disquieting or a “conspiracy theory”.

To assume that this ideology is dead and no longer powerful is to buy into what has been referred to as “The Perestroika Deception” written by a Ukrainian KGB defector, Anatoliy Golitsyn (a pseudonym)⁵ who laid out in great detail in two books, the first in 1984 “New Lies for Old”, the long-term deception strategy formulated by the Soviet Union to appear to retreat from communism with an intent to isolate and cripple the US economically and diplomatically; and the expanded on in 1995 in “The Perestroika Deception”.⁶ If you read these books, you will see that the strategy developed by the Soviets in the 1980’s has been followed and executed to an eerie accuracy. Analysis by several experts concluded that 94% of Golitsyn’s predictions of Soviet goals listed in these two books have been implemented, an indication of the veracity and effectiveness of the strategy.

Another KGB defector, Yuri Bezmenov, observed of America in the 1980’s that “It takes about 15 to 20 years to demoralize a nation, ...the minimum number of years needed to ‘educate’ one generation of students” and that KGB agents there fellow travelers “would use abstract art, perverted music, pornographic images, homosexual rights, racist politics, pacifist foreign policy and socialist economics to demoralize America.”⁷ FBI reports from 1953 – 1960 confirming these activities are held at the Eisenhower Library, and stated that they examined CPUSA channels thru which foreign and domestic propaganda was directed at the American public and “these channels included the press and publishing, art and entertainment, exchanges and honors, diplomatic mediums, and educational programs.”⁸ Noted evangelist Herbert W. Armstrong who founded the Worldwide Church of God preached about these themes for more than 50 years into the late 1990’s.

“Psychological projection is a theory in psychology in which humans defend themselves against their own unconscious impulses or qualities (both positive and negative) by denying their existence in themselves while attributing them to others.”

The American Family

One has to only witness what is happening today on our college campuses to restrict free speech to understand how well they have succeeded. Our children who are products of the public school system know little of our Constitution and Founding Fathers, cannot think critically, and

thus are easily swayed by agents of change but really agents of chaos, and then globalism, climate change, and social mores not supported by Christian, Jewish, or Muslim religions. This has severely undermined our social fabric and traditional family structure without which we have no culture and no core to resist major challenges. Destruction of the family structure has been a consistent target of the Communist Party.

We should also address the involvement of major political figures with Saul Alinsky, writer of *“Rules for Radicals”* who was never a member of the Communist Party, but as David Horowitz said, he “became an avatar of the postmodern left” and again as Chicago Alderman Leon Depress, a Communist Party member and classmate of Alinsky, who wrote that “emotionally he aligned very strongly with it (the Communists Party).” Alinsky is credited with helping in establishment of the tactics of infiltration – coupled with confrontation – that have been central to revolutionary political movements in the United States ...” He is quoted as saying that “the first radical known to man who rebelled against the establishment and did it so effectively that at least he won his own kingdom - Lucifer.” Hillary Clinton chose to write her college senior thesis on Alinsky’s work, with Alinsky himself contributing his own time to help her.” Also, according to Alinsky biographer Sanford Howitt, U.S. President Barack Obama was influenced by Alinsky and followed in his footsteps as a Chicago – based community organizer.⁹

Further, the Ayers family of Illinois contributed financially to various election campaigns of political figures like Barack Obama. A son, William (Bill) Ayers, co-founded the self-described Communist revolutionary group *Weatherman Underground*, along with his wife Bernardine Dohrn, and among other activities this group bombed the Pentagon and the US Capitol Building. William Ayers served with Obama on two boards together, and has been quoted as stating in 1995 that “The ethics of communism still appeal to me”.^{10, 11}

“Bill Ayers is a limousine revolutionary. He was born into a wealthy Chicago family, raised in the leafy western Chicago suburbs, educated at the best schools, and benefited from connections and privilege wherever he turned. His father, Thomas Ayers, was CEO and president of Commonwealth Edison, Chicago’s electric utility company, and sat on several influential boards, including those of the *Chicago Tribune*, Northwestern University, and the Chicago Symphony. In 1966, Mayor Richard J. Daley enlisted Thomas Ayers, a close friend, to head negotiations with Dr. Martin Luther King for a city-wide open housing agreement.

Tom Ayers was so successful at talking out of both sides of his mouth that King claimed victory while, according to local press accounts, Daley could claim he was able to ‘preserve the segregationist status quo.’ ”¹²

National Security Strategy

Thus, when the President turns to confront dangerous developments such as the now rapidly developing nuclear capabilities of an Iran and N. Korea, he is undermined at every turn, his military has too few soldiers and too few ships, Army Infantry basic training is now graduating basic training classes with many females which will significantly undermine unit cohesion and combat effectiveness. Department of Defense pays for sex change operations, this is factual. This degradation will result in a limited capability to prevent or stop a clash among third world countries, i.e. Iran and Iraq, an attack on Israel, or a threat by terrorists to destroy a US city if we don’t do as they dictate. You will live to see this at the rate of disintegration we are witnessing. And yet, turn on your television or radio or cellphone tomorrow, and listen to one more theory or how Trump colluded with Russia, and that they interfered with our election, and therefore one of the smartest women in the world did not become President, and if she had, things would be different now.

What I know is that the Middle East is in upheaval, that over 400,000 have been killed in Syria during the watch of President Obama, that we contributed to the downfall of Qaddafi in

Libya which is now controlled by ISIS, and that President Obama publicly called for the downfall of the Egyptian President Mubarak (I provided a talking point for President Clinton when he met with President Mubarak concerning an alleged chemical facility in Egypt which led to an inspection by US authorities). These words by Obama contributed to Mubarak's downfall, succeeded in power by the extremist Muslim Brotherhood before the Egyptian military re-asserted control. Do we need to discuss the disgrace of actions not taken to defend the US Ambassador Stevens at Benghazi? Did the Clinton Foundation assist in the sale of 20% of our Uranium resources to a Russian controlled entity which was approved by Secretary of State Clinton? Did the Obama Administration support the overturning of a democratically elected president in the Ukraine and was any action taken to stop the takeover of Crimea? And how exactly has Trump favored Russia other than to jointly contest Muslim terrorism which the Russians faced in Chechnya. Seems to me that we are on the edge of open conflict with Russia as this is written. We can go back even further to the Clinton Administration who sold after my retirement from service in 1993, many valuable technologies to China (the PRC or Chicom) to include advanced missile telemetry, satellite technology useful for targeting, and the mating of a payload or warhead to the missile. I have personal knowledge of this as I had US government veto authority for two years over 5,000 export licenses to 3rd World and countries of interest such as Germany (supplier to Iran), and to my knowledge was not reversed on any of those vetoes by the State or Commerce Departments. This links directly to the Clinton Foundation.

Conclusion

The battle so described above is between forces supporting globalism, Communism is a type of globalism, as are world bodies like the UN, against those who favor America First, defending our borders, and not undermining our economy in order to support UN and other globalist goals. Thus the US contributes large sums of money, not always well spent, only to bring our country down to the level of others, with very little in return. What was China's specific requirements or goals until 2030 as the worlds' biggest polluter under the Paris Accord. Answer - there was none. So think long and hard about your choices, but clearly it is between America and a world community which generally does not like us. If you wish to become a soldier in the party which supports the globalists, you then become a mercenary in a war which benefits those who are opposed to the country which raised you, who gave you this exceptional standard of living which is the envy of the world, and who defends you. Is that America or the global community, the EU, the UN?

My Russian translator in Moscow once told me that the Japanese have a saying: "Eat Chinese food, marry a Russian woman, live in America". I responded that I knew we could agree on something! So, "maybe", the Russians have out-foxed and manipulated our intelligence and investigative agencies, and "maybe" we are destroying ourselves, and "maybe" it will be very difficult if not impossible to put this all together again, and "maybe" we need to get our act together in defense of this great democratic experiment in freedom *post – haste* or it will be too late.

As "Pogo" said in his most famous phrase is "We have met the enemy and he is us."

But this too you should consider:

Hilaire Belloc, the great British essayist, quoted by the brilliant William F. Buckley, wrote:

"We sit by and watch the barbarian. We tolerate him in the long stretches of peace, we are not afraid. We are tickled by his irreverence; his comic inversion of our old certitudes and

our fixed creed refreshes us; we laugh. But as we laugh we are watched by large and awful faces from beyond, and on these faces there are no smiles.”

Kenn Riordan, Jr., USA (Ret)

~end~

Thank you Kenn for another eye opening article! We appreciate the work you put into this!

June 30th Illinois legislators failed to enact a budget for its third fiscal year in a row. Negotiations continue amid some begging some fighting and little hope. Lawmakers continue to meet. The failure marked a continuation of the historic impasse that’s left Illinois without a full-year budget for 3 years, and which S&P warned one month ago that if they can’t get this under control , will likely result in a humiliating and unprecedented downgrade of the 5th most populous US state to junk status. **All debt has to be repaid, either by the lender or the borrower.**

Some of you might recall , in a speech before the National Press Club on October 29, 1975, President Gerald Ford denies the near-bankrupt New York City a federal bailout, prompting the New York Daily News to run the infamous "Drop Dead" headline the next day. Time will tell the fate of Illinois. Let’s hope they can turn themselves around. Sadly, Illinois is not the only State in trouble created by over spending and under budgeting. Perhaps something could have been learned from Margaret Thatcher. “The trouble with Socialism is that eventually you run out of other people’s money.”.

.....
We are sometimes asked what we think of bitcoins. To be honest, Pat and I have never liked them or trusted enough to invest in them since they are a crypto currency and we don’t want to risk the money on something we can’t hold. That being said, a longtime friend and client came to me with a new way to get into bitcoins without investing much at all. Actually, less than \$100 got us started. As a skeptic and a non-gambling person I took a chance. Boy, am I glad I did! We

have already been paid many times my original entry and look forward to our merger, timid start growing into something pretty nice! If you would like to learn more about what this is please call our office and ask for Linda or Janell 480-820-5877 we can email you more information and get you in touch with one of the founders of this system to answer any of your questions. With a little patience you could see some pretty awesome results like we have. . This is an exciting and fun new thing we are trying and have been pretty happily impressed with it!

The afore mentioned IS NOT AND HAS NO CONNECTION WITH RESOURCE CONSULTANTS. Resource Consultants, Inc. is a full service precious metals company. Call us for buying or selling *physical* Gold Silver Platinum or Palladium coins or bullion. We also work with Precious metals IRAs as well as U.S. Numismatics Gold or Silver coins. 800-494-4149. Please share our letter with your friends and family and make sure they sign up on line www.buysilvernow.com and "Like" us on Facebook for access to our updates and free newsletters.

Here is a great opportunity to earn the Crypto Currency "Bitcoin". For less than \$100 you can have multiple positions in NetworkerBitcoin.com
